## **NRG-CC012CD "SYMON"**

**Managing Symptoms and Psychological Distress During Oral Anti-Cancer Treatment**

**17 July 2025**

**Practice Personnel Update**

**Presenters:**

**Dr. Alla Sikorskii, Jamillah Gross-Caldwell, Grey Freyler-sythe**

This NRG-Oncology protocol is being conducted in collaboration with NIH/NCI R01 #1R01CA279472-01 funding to Drs. Sikorskii MPI (contact), Badger (MPI) and Crane (MPI).

# Study Updates

## CTSU Updates

Administrative amendment 3  
approved 6/16/2025

Document	Details	CTSU Post Date
Protocol	<p>Amendment 3</p> <ul style="list-style-type: none"><li>• Adding new sites/practices (12+ or 6+ per arm)</li><li>• Sample size – overall sample the same (516) but site-specific max increased to 45</li><li>• Minor changes to report recipients and general language</li></ul>	6/23/25
Consent Forms - PATIENT	<ul style="list-style-type: none"><li>• Adding study phone number and caller ID</li></ul>	6/23/25
Recruitment Scripts	<ul style="list-style-type: none"><li>• Language clarifications and adding study phone number/caller ID</li></ul>	6/23/25

# Progress

- Opened to patient accrual 10/4/2024
  - N=147 patients enrolled (as of 7/11/25)
- 15 sites enrolled
  - N=46 nonpatients enrolled (as of 6/30/25)

## Patient Enrollments

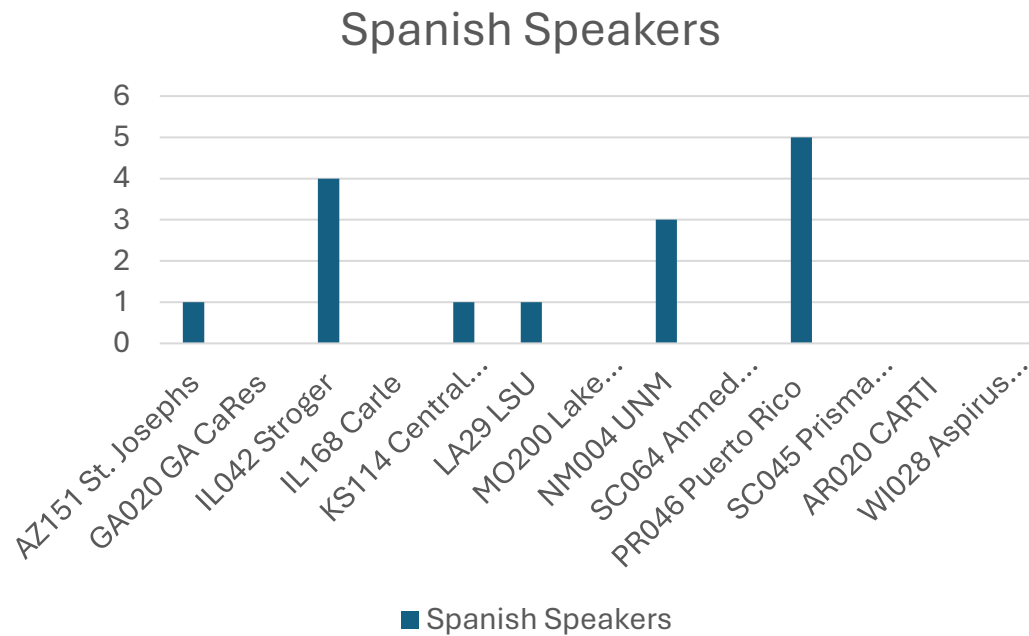

- AZ151 St. Josephs n=13
- GA020 GA CaRes n=14
- IL042 Stroger n=9
- **IL168 Carle n=20**
- KS114 Central Care Ozarks n=4
- LA29 LSU n=6
- MO200 Lake Regional Ozarks AF n=14
- NM004 UNM n=14
- SC064 Anmed Upstate Carolina n=15
- PR046 Puerto Rico n=5
- SC045 Prisma Health n=6
- AR020 CARTI n=8
- **WI028 Aspirus CROWN n=19**

## Patient Enrollments by Month

# Spanish-speakers Enrollment

- Target 15% Spanish speakers
  - 78/516 target
- Enrollments to date
  - N=15

# Brief Study Overview

# Participant Intervention

# Review of Practice Study Activities

# Practice Personnel Eligibility Criteria

Practice personnel are key stakeholders in this research study. They will:

- Consent to participation
- Complete baseline demographic information form
- Complete baseline questionnaire about symptom management
- Receive symptom reports
- Complete brief monthly “actions taken” checklist
- Complete assessments at months 12 and 25

Eligible: physicians, nurses, nurse practitioners, advanced practice providers, physician assistants, medical assistants, pharmacists, etc.

- Planned to be involved in usual care for at least one enrolled patient during patient’s participation in the study.
- At least one practice personnel has to agree to receive IVR reports and complete monthly forms (about 30 minutes). Multiple people can receive these reports.

Can be as few as **one** person or as many as applicable, ideally ~4

# Patient Key Eligibility Criteria

- Starting a new course of an oral anti-cancer agent within the next 4 weeks of registration or have started an oral agent within the past ~~4~~ **8** weeks (as of Protocol V2).
  - The list of agents is always posted to the CTSU website, but if an agent in question is not on that list, please email [symon@miami.edu](mailto:symon@miami.edu) if you have questions
  - Can be receiving sex hormone inhibitor in *conjunction* with other oral anti-cancer agent
  - **Can** be receiving treatment with immune checkpoint inhibitor at enrollment (as of Protocol V2)
  - All concomitant medications and supportive care treatments are acceptable.
- Cannot be receiving *only* sex hormone inhibitor treatment
- Cannot be receiving competing supportive care:
  - Cannot be in any other symptom monitoring/management programs or studies
  - Cannot have had 2+ counseling/therapy sessions in past month for mood/psychosocial wellbeing
- Cannot be in hospice at time of enrollment
- Must be able to speak and understand English or Spanish.
- Must have access to a telephone with a touchpad and ability to hear a recording

# Recruitment – Tips and Best Practices

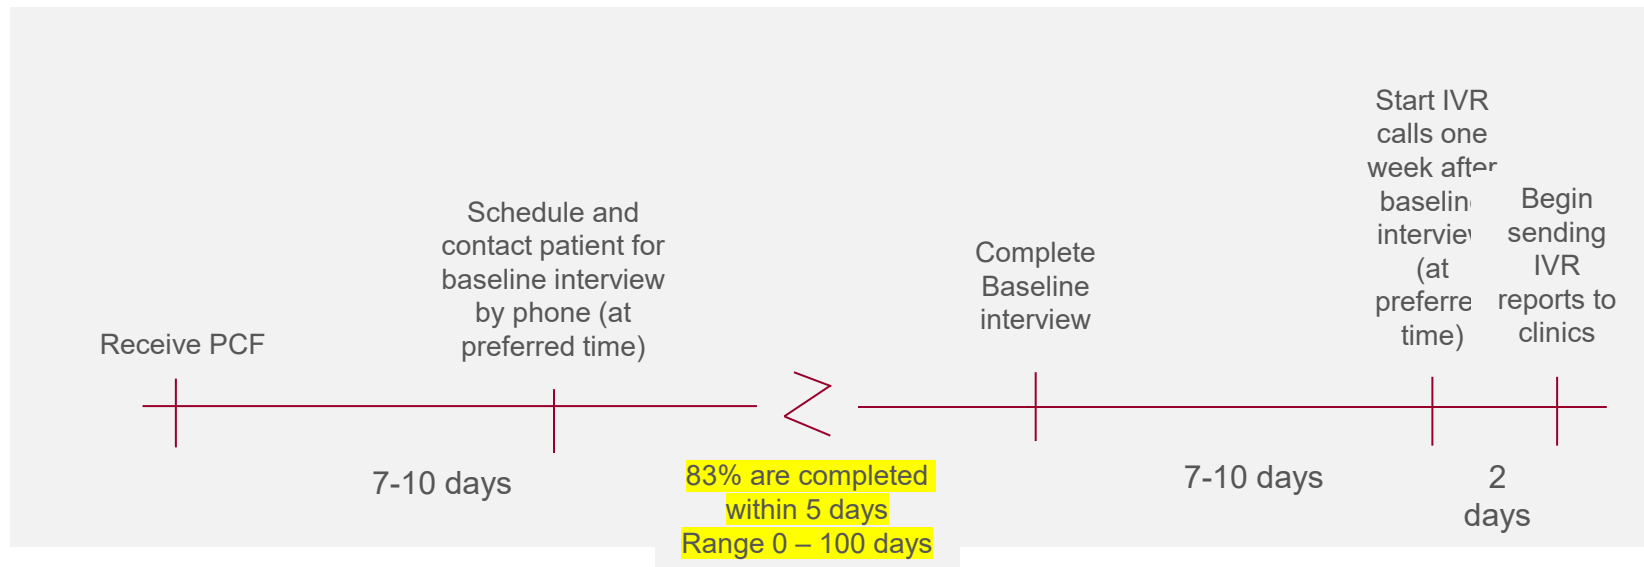

Refer to the Recruitment Script (Control or Intervention) for additional notes

- Update posted this week 6/23/2025

## Notes

- Patients will participate for 17 weeks
- Patients will:
  - Receive 3 phone calls for interviews by study staff (baseline, week 13, and week 17)
  - Receive weekly *automated* phone calls for all 17 weeks to report their symptoms using their keypad
- Some patients may also receive TIPC with a behavioral health specialist for 8 weeks if:
  - 1) they are enrolled by an ATSM+IVR site and
  - 2) they report elevated emotional distress for two consecutive weeks in the first 4 weeks of the study
- **Calls will be coming from: 888-602-8325 (Caller ID: MWR UMIAMI SYLV)**
  - This is now added to ICF so they can take it with them
  - This can be added to a patient's phone contact list if that helps.
  - Patients can call this number, but it is a voicemail only line. They will not reach a human directly! They can also send us a text message.

# Timeline

# Next Month's Meetings

- NRG Summer Meeting - 7/23-7/25

# Past Discussion Notes

- If your patient withdraws from the study, please email [symon@miami.edu](mailto:symon@miami.edu) to notify Miami so that we can stop calls. We don't get Rave notifications automatically.
- Vital Status Reports in Rave
  - Calendar-based date is only an estimate
    - This date is set to a max of 10 days after registration, and the real date will depend on when baseline can be completed (potentially weeks later, dependent upon patients answering and having started the oral agent).
  - Weeks should align, even if dates don't.
    - The week 1 vital status should be completed when the first symptom report is received from Miami. Ideally, within 1 week of due date.
  - There is flexibility in the dates, up to 2 weeks is okay.
    - If > 2 weeks, contact [symon@miami.edu](mailto:symon@miami.edu) to request for NRG to update the calendar-based date.
