# Reminders and Questions

# Vital Status Reports in RAVE

- Vital Status Reports in Rave
  - Calendar-based date is only an estimate
    - This date is set to a max of 45 days after registration now!!
    - Note: the real start date will depend on when baseline can be completed (potentially weeks later, dependent upon patients answering and having started the oral agent).
  - Weeks should align, even if dates don't.
    - The week 1 vital status should be completed when the first symptom report is received from Miami.
    - Week 1 can be up to 2 weeks different from calendar-based start date. If >2 weeks, email [symon@miami.edu](mailto:symon@miami.edu) and provide the following information:
      - » Subject #: CC012CD-00XXX
      - » Original Calendar Base Date: 6/30/2025
      - » Requested change to Calendar Base Date: 7/30/2025

# Similar/Competing Studies

- **CA204-008 PREAMBLE** (Prospective Research Assessment in Multiple Myeloma): Co-enrollment is allowed, because it is an observational study
- **EAQ221CD CONCURxP** (Medication Adherence): Sites with this trial open should offer the CONCURxP protocol first, and then SYMON can be offered to participants who decline the first.
- **EQA222CD CostCOM** (Financial Navigation): Co-enrollment is allowed, because it is not a symptom-specific intervention
- **COSMIC WF2304-A172401** (Cannabis Cohort): Co-enrollment is allowed, because COSMIC is observational.
- **NRG-CC015** (HEAL-ABC Mindfulness): Not competing. Breast cancer patients on this protocol must be 6 months post-treatment completion, so would not be eligible for SYMON.
